EXECUTIVE SUMMARY

The purpose of this document is to set out the use cases tested by the IT2Rail solution demonstrator.

It describes first the IT2Rail Corridor in terms of users' needs initially defined together at the Hanover meeting for CREL and then reviewed to AREL and FREL.

Later, it defines the Corridor use cases, actors and resources involved, as well as the specific goals of each sub-part of the corridor.

Another document of the "Pilot Test Readiness Review Pack (FREL)" defines the related WP7 level tests cases (Pilot Tests Cases Definitions).

All terms used in this document are defined in the IT2Rail glossary[1], which forms an integral part of the "D7.10 Development Readiness Review Pack (FREL)".
