

## **EXECUTIVE SUMMARY**

---

This deliverable complements the Trip Tracker Software components pack. It introduces the Trip Tracker process flow architecture, lists the Trip Tracker components, describes the Trip Tracker functional architecture, depicts the Trip Tracker interfaces and enumerates particular services delivered within the WP4.

In its main part, this document contains the technical description of the Trip Tracker components and their interfaces, as well as deployment instructions. Besides that, the document includes additional information about the required third parties or the known issues and limitations of delivered functionalities. It also refers to the complementary service documentation.
