

## EXECUTIVE SUMMARY

---

This document describes the software component pack for the work package 2 (Travel Shopping).

The technical description of the following Travel Shopping components are incorporated:

- Mobility Request Manager
- Shopping Orchestrator
- Metaroute Explorer
- Offer Builder

Included in the technical description are the internal interfaces between these components (within WP2) and, where appropriate, their external interfaces with components of WP1 Interoperability Framework as well as WP5 Travel Companion.

The technical pre-requisites and deployment instructions are also detailed in this document.

Thus, components and interfaces are briefly described, according to the Conceptual Interface Specification document as well as the Conceptual Requirements Specification document, and their availability for future use is detailed:

- Availability of software with or without source code;
- Service Sample for each component.
